Paul Mitchell The School Norman

QUANTITATIVE AND QUALITATIVE FACTORS

Factors for measuring the student's progress toward satisfactory completion of the program include maintaining:

- To determine whether a student meets the academic requirements for Satisfactory Academic Progress, theory and practical assessments are averaged together to give a minimum cumulative academic grade of 70%.
- A minimum cumulative attendance level of 80% of scheduled hours**

**To meet the state practical requirements for graduation, students must complete all assigned practical skill assessments. See LEARNING PARTICIPATION GUIDELINES.*

***To determine a student's rate of attendance, divide the cumulative number of hours completed by the scheduled hours to date.*

A student who has not achieved the minimum cumulative GPA of 70% and/or who has not successfully completed at least a cumulative rate of attendance of 80% is not eligible for Title IV assistance or Veteran's Affairs Education Benefits, if applicable, unless the student is on warning or has prevailed upon appeal of the determination that resulted in a status of Financial Aid Probation.
