Paul Mitchell The School San Diego

DISTANCE EDUCATION AND HYBRID REQUIREMENTS

Paul Mitchell The School San Diego provides each Future Professional the opportunity to enroll in a hybrid program of study that provides for both on-campus education, as well as distance learning. Future Professionals also have the opportunity to select a program of study that encompasses only oncampus education. Both delivery methods offer the same educational quality, it is up to the individual learner to determine which delivery method best works for their particular educational needs.

Upon completion of all curriculum requirements, Future Professionals who are enrolled in a hybrid program must demonstrate competency by taking and passing written comprehensive Academic exams and Practical assessments, which are administered on-site. All school transcripts will specifically outline those course hours completed via distance education. Please note, that in accordance with the school's accrediting agency, practical experiences on a live model or service guest can only occur on-campus.

As a part of distance education, the school will ensure the content is delivered in a manner that meets the school's mission statement and educational objectives by assessing each Future Professional's competence. Participation will be documented in a log of all student activity. The Future Professional's qualitative academic performance for the distance education (modules) will be evaluated through testing and educational assignments. Future Professional surveys (Core, Adaptive, Creative and upon graduation), Learning Leader evaluations during distance learning, and a comparison of outcome rates for those who were enrolled in the hybrid program versus on-campus learning only, will be compared to validate the quality of the distance learning.

In order to enroll in the hybrid program of study, the Future Professional must have the following minimum hardware, software, and network requirements:

Minimum Student Skills Requirements: Future Professionals are expected to have at least the following skills before taking distance education courses:

- Basic keyboarding competence
- Elementary knowledge of their computer operating system
